Dear Parents

Year 11 DT Contribution

I hope that your son/daughter has been enjoying their study of Resistant Materials so far this year. I am pleased to see our students developing their knowledge, and experimenting with the working properties of a wide range of materials including timbers, polymers and metals.

As part of their controlled assessment, students are required to manufacture a high quality educational toy or light device. We encourage our students to take pride in all their Resistant Materials work including their practical making. Therefore, we require a contribution of £5 to help continue to provide high quality tools and materials, which will be used to make their final product. This contribution means that your son/daughter will be able to take home their product to keep upon the completion of the assessment process.

This contribution covers the costs of the practical element, however depending on the individual design of your son/daughter, we may require components to be provided by the student or a further small contribution in be made later in Year 11.

Please make your £5 contribution by Friday 15th December via ParentPay. If you use PayPoint, please contact Miss Green on 01473-466157 so that a barcode may be generated for this purchase.

If you have any questions about making the payment or about your child's study of Resistant Materials then please feel free to contact me.

Yours sincerely

Mrs A Brown
Associate Team Leader of Design Technology
